WELCOME

APPLICATIONS

We created the Bitnami Project to help spread the adoption of freely available, high quality Open Source web applications. Bitnami aims to make it easier than ever to discover, download and install Open Source software such as document and content management systems, wikis and blogging software.

You can learn more about Bitnami at <https://bitnami.com>

The Bitnami WAMP Stack is an easy to install software platform that greatly simplifies the deployment of Open Source web stacks. It includes ready-to-run versions of Apache, MySQL and PHP. Bitnami WAMP Stack is distributed for free under the Apache 2.0 license.

To get started with Bitnami WAMP Stack we suggest the following:

- 1.- [Check your installation](#). The stack is self-contained and independent on your system, you can find all components in your installation direct
- 2.- [Start the servers](#). Open the graphical user interface to start the installed servers. You can also use "ct
- 3.- [Add more apps](#). Download and install additional applications.
- 4.- [Deploy your own project](#). Check out our [Start Guide](#) for adding application modules to the Bitnami WAMP Stack. This way you can get almost any web application you want up and running in less than 5 minutes.

20

WELCOME

APPLICATIONS

Bitnami phpMyAdmin module

phpMyAdmin is tool to handle the administration of MySQL over the Web. For security reasons it is password protected and only accessible when using 127.0.0.1 as the hostname. Check [this guide](#) to access phpMyAdmin remotely.
